Successful applicants invited to submit Full Application Forms

**Friday 22nd December 2006**
Deadline for submission of Full Application Forms

**February 2007**
Publication of final decisions

**April 2007**
Projects can commence delivery
Appendix 2

Industrial Estates Theme

Purpose:

Working with a partnership of businesses based on the St Mary Cray industrial estates, the project is intended to tackle issues such as crime / antisocial behaviour, recycling / waste reduction and workforce skills. The emphasis is on assisting businesses to help themselves through collaborative working, with the introduction of practical projects for improving security arrangements, joint training events and local recycling and waste management initiatives. The project will also assist the businesses to develop a more formal and sustainable partnership, which could allow the benefits to be extended to more businesses and their employees in the Cray Valley area.

Activities to be supported:

- Projects to reduce the impact of crime and anti-social behaviour on businesses, including capital investment in security equipment (e.g. Strengthened access points, anti-climb fencing etc.) and also assistance for businesses to develop closer cooperation and sharing of best practice (for example through the introduction of a Business Watch scheme).

- Developing the skill levels of employees of businesses located on the estate, through shared training seminars on subjects of generic interest (e.g. First Aid).

- Provision of IT audit to enable businesses to make more effective use of ICT and to identify gaps in terms of both infrastructure and skills.

- Projects to enable businesses to better manage their waste, including advice on waste management and potentially the development of a pilot local recycling scheme.

- Activities to promote the area to increase attractiveness to potential inward investors and local growth businesses.

- Activities to develop and formalise the business partnership to improve sustainability beyond the term of the LDA-funded project.

Timescale of the project

Two years – from April 2007 to March 2009

Financial summary

It is expected that the total cost of the project over two years will be in the region of £130,000, with approximately £90,000 of this being met from the LDA Opportunities Fund. The remaining costs will be met through match funding from the businesses themselves and other partners.
