In addition to the grant scheme, where an interest free loan is offered, then there will be a saving to the owner in interest as opposed to a commercial rate loan.

## Example:

Interest charges for a secured loan at commercial rates assuming 6\% per annum
For example a loan for a three bedroom property over three years from LBB - we could offer a maximum of $£ 10,800$ with equal monthly repayment of $£ 300$
per month
On the open market a $£ 10,800$ loan over a three year period with an interest rate of $6 \%$ would equal to $£ 328.56$ monthly repayments.
Total amount repaid £11828.16
Total interest repaid on top of loan amount is $£ 1028.19$, meaning that the land lord will be paying an additional $£ 28.56$ per month in interest fees if he sourced a commercial loan.
