

Appendix 8b

Additional feedback received post consultation closure – 24.03.2015

Following the closure of the official consultation period on Friday 13 March, the Council has received a further 116 additional pieces of correspondence, including Council survey forms, “pro-formas”, letters and emails. In addition, various correspondence has also been received by Ward Councillors as it has been throughout the consultation process.

15 of the 116 responses were received by email with 14 opposing BHAL’s proposals and 1 in support. 87 Council survey forms were received, with 58 opposing the proposals, 27 in favour of them and 2 not expressing a view. 12 “pro-forma” letters, details of which were outlined in Appendix 8, have been received, all opposing the proposals. 2 letters have also been received opposing the proposals.

5 of the 15 email responses have been received from Groups, all opposing the BHAL proposals, which are listed in the table below.

| Group/Business Name | Consultation response |
|-------------------------------|------------------------------|
| Crofton Residents Association | No |
| Farnborough Park Estate Ltd | No |
| Keston Park (1975) Limited | No |
| London Borough of Bexley | No |
| Sidcup Community Group | No |

For clarity, whilst Woldingham Parish Council responded to the official online consultation, with their view opposing the BHAL proposals, this group response should be included alongside all the other group responses. It should also be noted that Jo Johnson MP has responded to the official online consultation and has outlined his view opposing the BHAL proposals by email.

Addendum to ‘red and blue dot map’ - To portray the information graphically and by household response, a complex process of ‘geo coding’ took place, to effectively place the responses onto the ‘red and blue dot map’. This process did not successfully pick up each and every address but the map does show the overall trend for responses across the borough in a way that simple reporting by ward does not and this is why the map was published as it is.
