

Proposed Lighting 41-45 High Street Beckenham

Meyer Uplight 200, Rotationally Symmetrical narrow beam – 5 x Led 1W warm white 3000k , 6no. Luminaires to sit inside a concrete recessed liner, provided by others

The designs focus on symmetry; therefore, the importance lies within the setting out detail that each luminaire is precisely set the same, across all columns. It may be necessary to check ground conditions of all prior to final installation of liners.
