Introduction & Executive Summary

This is the Quarter 2 Patient Experience Report for Healthwatch Bromley, covering the period from July - September 2022. Healthwatch was created by the Health and Social Care Act 2012 to understand the needs, experiences and concerns of people who use health and social care services and to speak out on their behalf. Healthwatch Bromley has a duty to gather and publish the views of patients and service users in the borough. To fulfil this duty, a comprehensive patient experience data collection programme is operated. Annually this yields approximately 2,400 patient experiences.

Normally, our Patient Experience Officer, supported by a team of volunteers, visits health and social care services weekly to talk to and hear from patients, service users, carers and relatives about their experiences of local services. These patient experience comments and reviews are gathered using a standard form (see Appendix). The form asks patients for simple star ratings on their overall experience, likelihood to recommend a service, treatment, booking and a number of other areas. In addition, there is a free text box where patients are asked to leave a review or feedback comments. We approach every patient, capture their experience in their own words and seek consent for their feedback to be published on the Healthwatch Bromley website using our Digital Feedback Centre. People can leave their name or comment anonymously. At the end of each service visit, the Patient Experience Officer will relay any urgent matters requiring attention to the service manager.

Whilst we aim to gather patient experience comments and reviews from a representative sample of Bromley's population, we acknowledge that the type of service used varies from person to person, and people use different services at different stages in their lives. Some people, of course, do not use services at all. All those contacted are asked for monitoring information, but some do not wish to provide this.

Healthwatch Bromley's website continues to be available for the public to visit and independently provide service feedback and comments through our Digital Feedback Centre. Our questions are uniform across the Digital Feedback Centre and the physically collected forms.

This report covers the Quarter 2 period, July - September. During this time, 600 reviews were collected. Of the 600 reviews collected this quarter, 422 (70%) were positive with star rating 4-5, 31 (5%) neutral with star rating 3 and 147 (25%) negative with star rating 1-2. The information presented within this report reflects the individual patient experience of health and social care services. Healthwatch Bromley presents this information for consideration and anticipates that it will be used to highlight good practice and areas for improvement.

Our Data Explained

Healthwatch Bromley use a Digital Feedback Centre (on our website) and Informatics system (software sitting behind the Digital Feedback Centre) to capture and analyse patient experience feedback. The Informatics system is currently used by approximately 1/3 of the Healthwatch Network across England and it captures feedback in a number of ways:

1. It asks for an overall star rating of the service (between 1-5)
2. It provides a free text box for comment
3. It asks for a star rating against specific domain areas (between 1-5)

In terms of reporting, the above provides Healthwatch with several data sets.

Star ratings provide a simple snapshot average, both overall and against specific domain areas.

When it comes to the free text comment box, this is analysed in two different ways resulting in two different data sets:

- In the first instance, our informatics system creates a 'sentiment score' by using a sophisticated algorithm to analyse comments and categorise them as positive, negative or neutral. This is an automatic process. Where overall sentiment is highlighted in the report, it relates to this aspect of the process.
- In the second instance, free text comments are broken down and analysed for themes and sub themes. Where relevant, up to 5 themes and sub themes can be applied to any one patient experience comment. Upon each application of a theme or sub theme, a positive, negative or neutral sentiment is also applied. This is a manual process undertaken by trained staff and specially trained volunteers. The process is overseen by the Patient Experience Officer and regularly audited in order to ensure consistency. Where themes and related sentiment are discussed in the report, it relates to this aspect of the process.

Each of the areas described above provides an independent set of results which can be viewed separately or in conjunction with one another in order to gain an insight into a service or service area. It is important to note that correlation between different data sets may not be apparent, for example, a service may have an overall star rating of 4/5 but much lower ratings against individual domain areas.

Overall Star Ratings

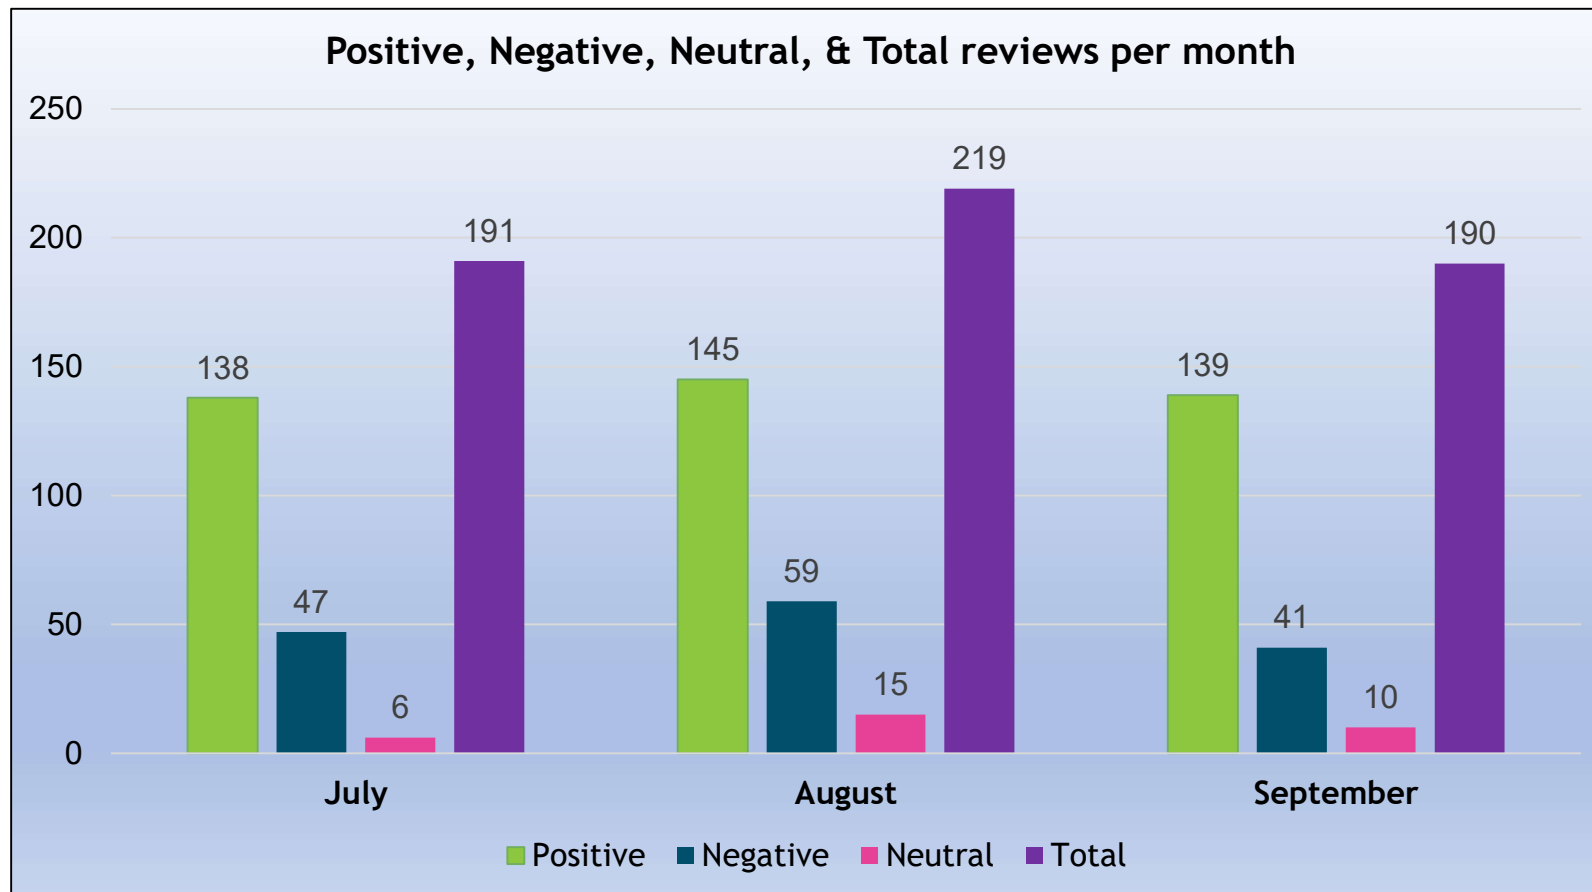

The number of patient reviews received for this quarter was **600**. The table below shows the distribution of the negative, neutral and positive patient reviews by each month and for the quarter as a whole. Please see Appendix for examples of our physical and online questionnaires.

Each patient was asked to give an overall rating out of 5 stars for the service(s) they attended. Star ratings of 1 and 2 indicate a negative response, a star rating of 3 indicates a neutral response and star ratings of 4 and 5 indicate a positive response. It is important to note that our experience looking at other boroughs has shown that people are very reluctant to give a negative rating of their care provider. When the 3* 'neutral' ratings are analysed in more detail we have traditionally found these to outline negative feedback. Therefore, where a significant number of 3* ratings are found, our experience tells us these areas are worthy of further attention to help identify areas for improvement.

Month	4-5 Star Reviews (Positive) ★ ★ ★ ★ ★	1-2 Star Reviews (Negative) ★ ★ ★ ★ ★	3 Star Reviews (Neutral) ★ ★ ★ ★ ★
July	138	47	6
August	145	59	15
September	139	41	10
Total	422	147	31

Overall Star Ratings continued

This chart provides a further breakdown of positive, negative, neutral and an overall total number of reviews for each month. We are very pleased that we have reached our target number of 600 reviews.

Overall Star Ratings continued

The pie charts show the breakdown of star ratings for each month and for the whole quarter.

The overall star ratings for services tell us that people are generally satisfied with the quality of services across the borough.

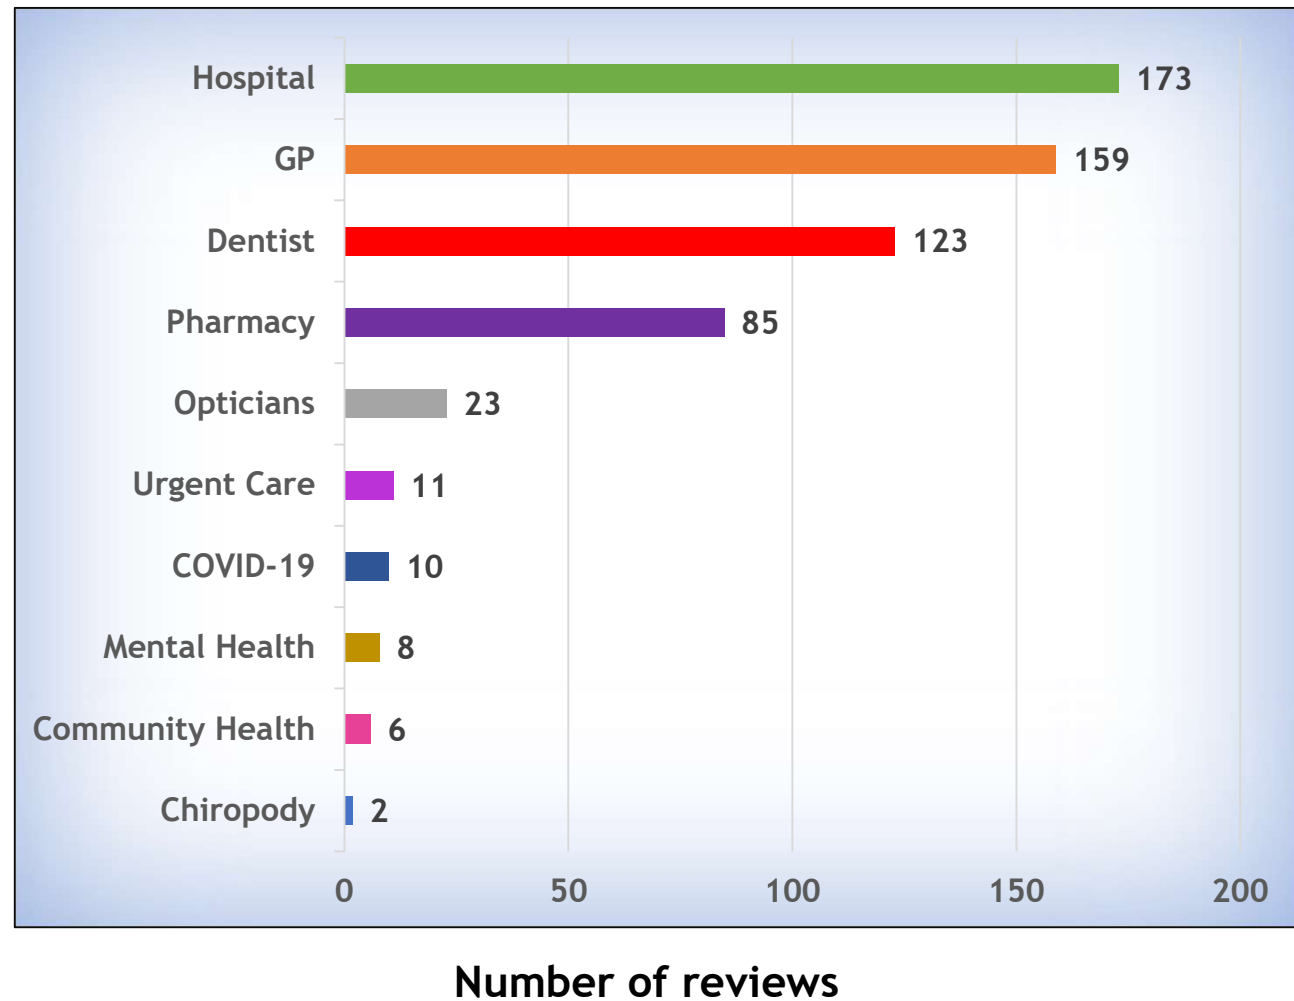

Total Reviews per Service Category

The patient reviews recorded for this quarter cover 10 service categories, as seen in this chart.

The category with the highest number of reviews recorded is Hospital (173), followed by GP (159), Dentist (123) and Pharmacy (85).

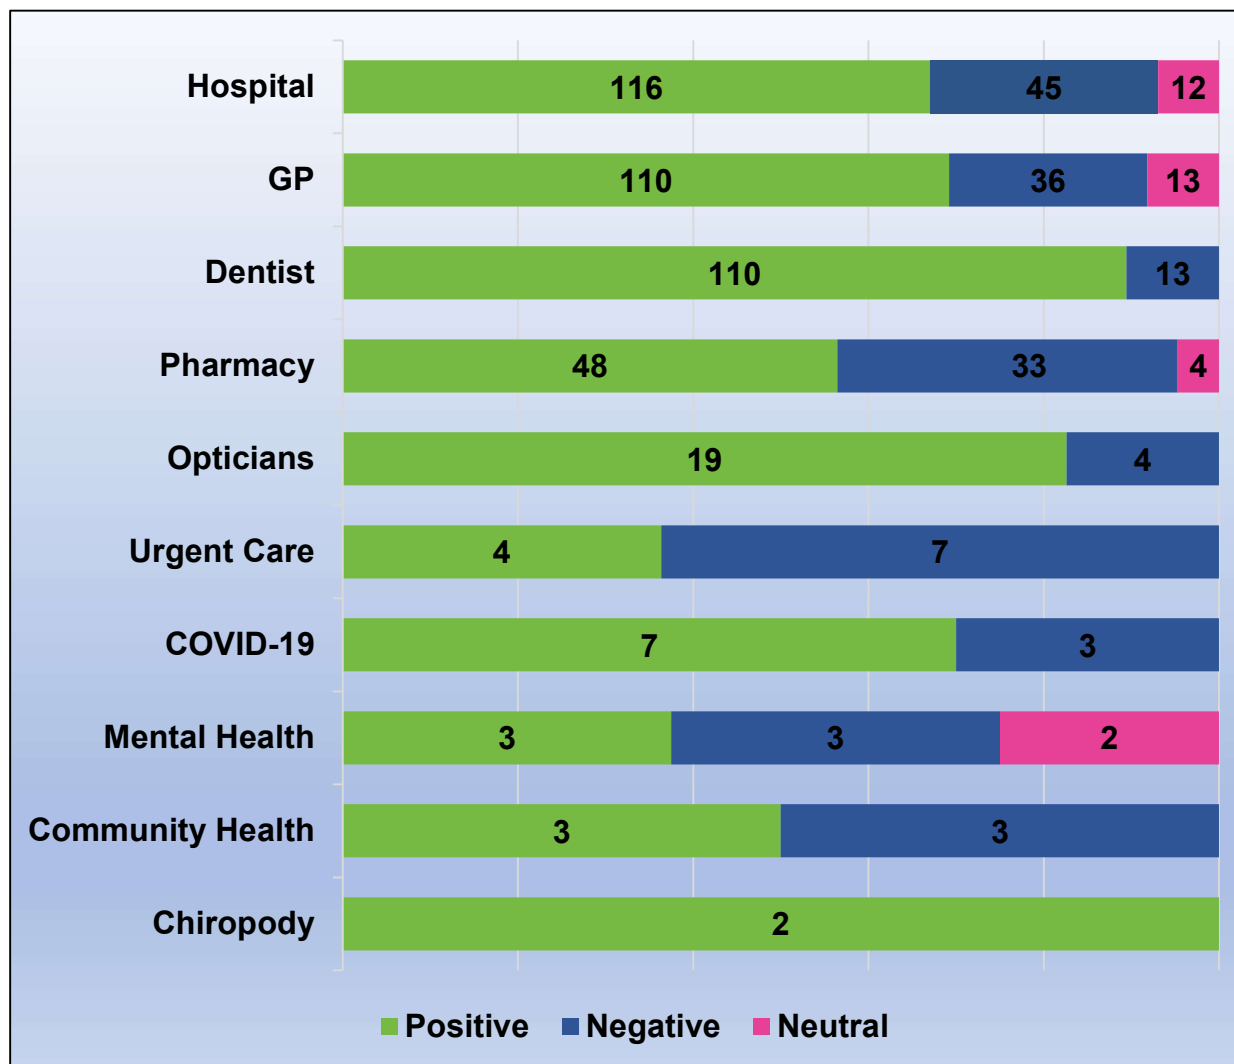

The service-types with the lowest number of reviews recorded are Community Health (6) and Chiropody (2).

Type of services

Distribution of Positive, Negative & Neutral

Type of services

Number of reviews

This chart illustrates the proportion of negative, neutral, and positive reviews within each of the ten service-type categories previously discussed. Reviews are categorised according to their star ratings.

Hospital received the most reviews this quarter (173). Of these, 26% (45) were negative, 7% (12) were neutral, and 67% (116) were positive.

GP services received the second highest number of reviews this quarter (159). Of these 23% (36) were negative, 8% (13) were neutral, and 69% (110) were positive.

Dentist received the third highest number of reviews this quarter (123). Of these 11% (13) were negative, and 89% (110) were positive.

Pharmacy received the fourth highest number of reviews this quarter (85). Of these 39% (33) were negative, 5% (4) were neutral, and 56% (48) were positive.

Themes and Sub-Themes

This section shows a breakdown of the main themes and sub-themes for service areas where we received a significant number of reviews. In Q2 these areas were: Hospital, GP and Dentist. After asking patients for an overall star rating of the service we ask them to "tell us more about your experience".

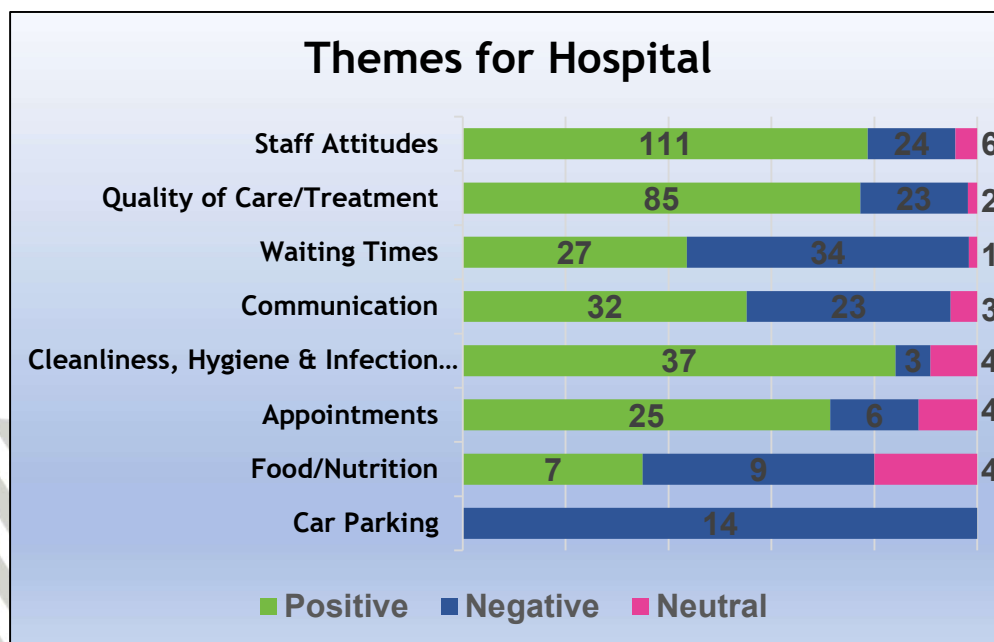

Each comment is uploaded to our Online Feedback Centre where up to five themes and sub-themes may be applied to the comment (see Appendix). For this reason, the total number of theme counts will differ from the total number of reviews for each service area. For each theme applied to a review, a positive, negative, or neutral 'sentiment' is allocated. The application of themes, sub-themes and sentiment is a manual process and differs from the star rating patients provide.

Hospital Themes and Sub-Themes

Hospital was the most reviewed service for this quarter, with a total of 173 reviews. **Staff Attitudes** was the most applied theme with a total of 141 counts, 79% (111 counts) being positive, 4% (6) being neutral, and 17% (24 counts) being negative. This indicates patient satisfaction with the way in which they were treated by staff .

The second most applied theme was **Quality of Care/Treatment** with a total of 110 counts; 77% (85 counts) reported positive reviews, 2% (2) were negative, and 21% (23 counts) were negative. People generally commented on the high standards of care and treatment received when visiting the hospital.

It's important to note that over half the people we engaged with were unhappy with the **Waiting Times** (55%) and **Car Parking** facilities available (100%).

Number of reviews

Positive reviews

“Doctors are really good.”

Hospital

“Appointment availability is great.”

Hospital

Negative reviews

“I find the parking is extremely difficult.”

Hospital

“Poor team communication.”

Hospital

GP Themes and Sub-Themes

GP services were the second most reviewed service for this quarter, with a total of 159 reviews. **Staff Attitudes** was the most applied theme with a total of 142 counts, 83% (118 counts) being positive, 2% (3 counts) being neutral, and 15% (21 counts) being negative. People commented on the high standards of professionalism from reception staff, nurses and GPs.

The second most applied theme was **Appointments** with a total of 101 counts; 47% (48 counts) reported positive reviews, 7% (3 counts) reported neutral, and 46% (47 counts) reported negative. This indicates that approximately half the people we engagement with were happy with appointments at their GP practice, but the other half were not.

We should also highlight that 32 (40%) reviews out of 81 were positive for **Communication**. This indicates that there is some room for improvement within the way communication is shared between staff and service users across the GP practices.

Number of reviews

Positive reviews

“Service is really good.”

GP Surgery

“I always get contacted when my prescriptions are due.”

GP Surgery

Negative reviews

“It’s always hard to get an appointment.”

GP Surgery

“I was given the wrong medication.”

GP Surgery

Dentist Themes and Sub-Themes

Dentist is the third most reviewed service for this quarter, with a total of 123 reviews. **Staff Attitudes** was the most applied theme with a total of 111 counts, 93% (103 counts) being positive and 7% (8 counts) being negative. People commented on the high standards of professionalism from their dentist as well as the reception staff.

The second most applied theme was **Quality of Care/Treatment** with a total of 103 counts; 95% (98 counts) reported positive reviews and 5% (5 counts) reported negative. This indicates that the majority of patients were satisfied with the care and treatment they received whilst using this health service.

Please note: the feedback we have gathered does not measure any difficulties in accessing services.

Number of reviews

Positive reviews

“Excellent service and level of care.”

Dentist

“Always cleaned to very high standards.”

Dentist

Negative reviews

“Terrible customer service.”

Dentist

“Cancelled my appointment without telling me.”

Dentist

Other Positive Reviews

This section provides an overview of the number of positive reviews by service area and goes on to give some examples of comments received. Looking at the positive reviews we have received allow us to highlight areas where a service is doing well. The data suggests that the majority of Bromley residents who have shared their experiences are satisfied with most of the services in Bromley.

Pharmacy

“So easy to deal with them for repeat prescriptions.”

Pharmacy

“Friendly, polite, helpful and prompt service.”

Pharmacy

“Delivered door to door throughout corona virus.”

Pharmacy

Opticians

“The contact lenses department have been amazing.”

Opticians

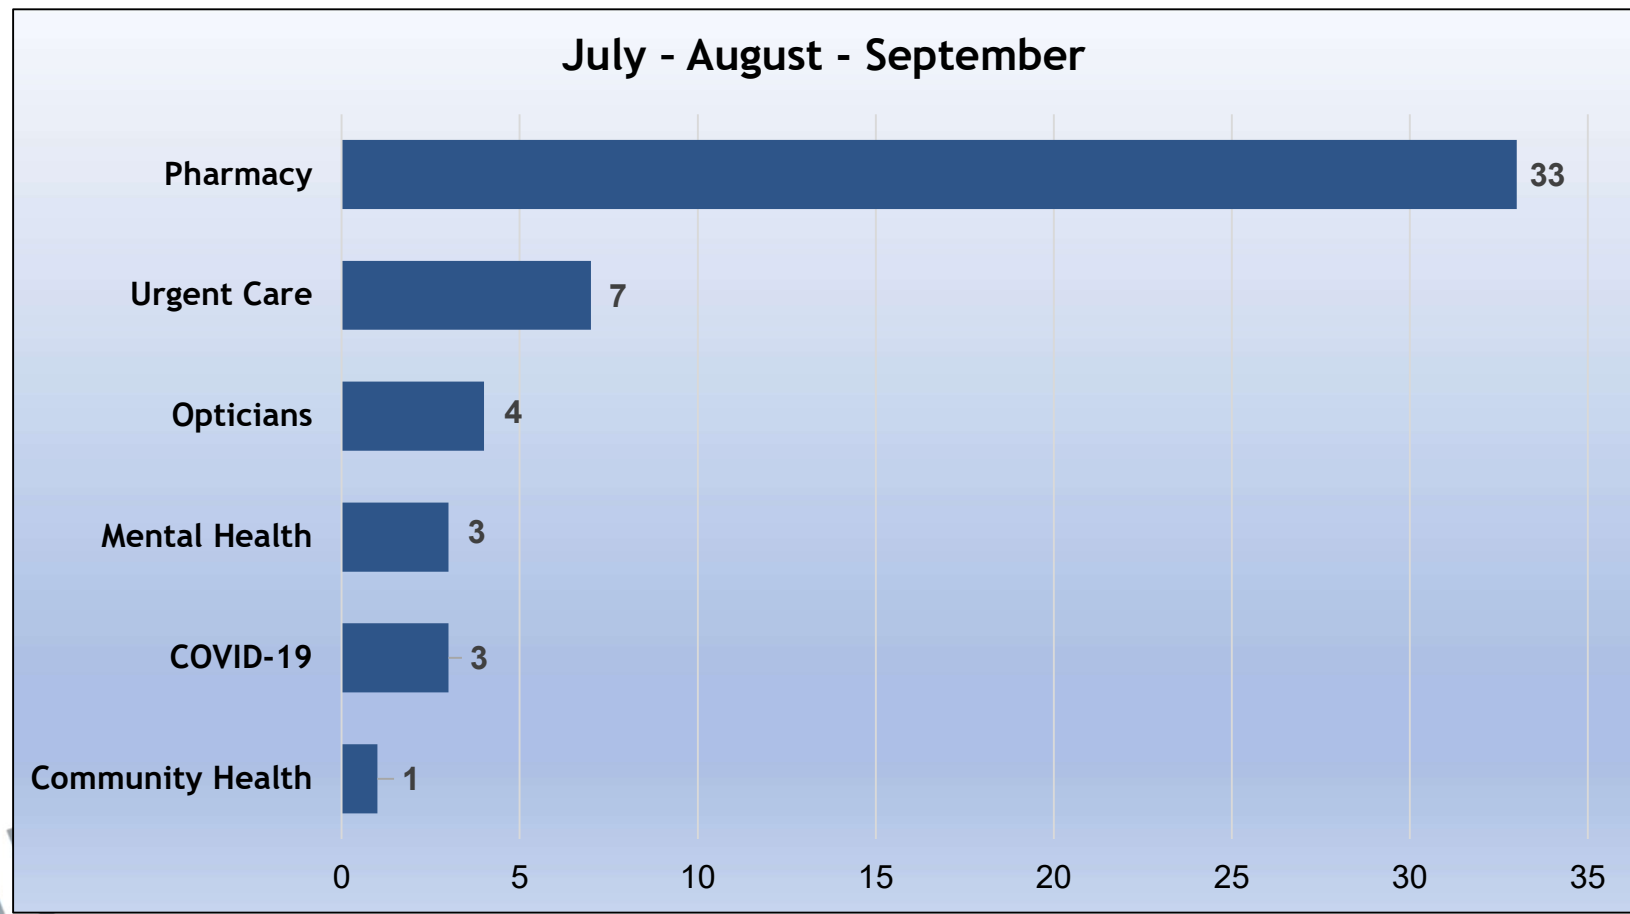

“My glasses were ready for collection within 48 hours.”

Opticians

Other Negative Reviews

This section provides an overview of the number of negative reviews by service area and goes on to give some example of comments received. By looking at the negative reviews received, we can better understand where a service needs to improve in order to provide a better experience.

Pharmacy

“Staff at counter were not wearing their masks correctly.”

Pharmacy

“The service is just so poor.”

Pharmacy

“Made me wait 30 minutes for my urgent prescription.”

Pharmacy

Urgent Care

“Was sent home due to low capacity.”

Urgent Care

“5hrs of waiting to be told to go to A&E.”

Urgent Care

Demographic Information

This section looks at the demographic information we have gathered this quarter. Our patient experience methodology changed in March 2020 as we couldn't conduct face-to-face engagement with service users. However, we began in-person patient engagement again in February 2022 and have been able to visit GP practices, hospitals, vaccination centres and community centres. We always seek to improve the completion of monitoring data. Further training and guidance has been provided for staff and volunteers to better support this.

The pie chart below shows the number of reviews received this quarter from gender groups. Excluding the 448 that are left blank, the majority of the reviews received this quarter are from females, with 96 (63%).

The pie chart below shows the number of reviews received this quarter from different ethnicity groups. In terms of ethnicity, excluding the 452 who did not complete this section, the largest proportion of feedback received this quarter was from people who identified as 'White British' with 104 (70%).

Gender

Ethnicity

Demographic Information

The pie chart below shows the number of reviews received this quarter from different religious groups. Excluding the 477 that are left blank, for the direct engagement reviews, 64 (52%) as None, 46 (37%) identified as Christian, 5 (4%) as Other Religion, 4 (3%) as Hindu, 2 (2%) as Muslim and 1 (1%) as Jewish or Sikh.

The pie chart below shows the number of reviews received this quarter from different age groups. Excluding the 457 that are left blank, most of the feedback received was from the 41-50 age group with a total of 29 (20%), followed by 51-60 and 61-70 with 23 (16%). The in-person patient engagement has enabled us to speak to a wider audience as we are engaging with services users waiting in GP practices, hospitals, vaccination or community centres.

Religion

Age

For the Q2 report, we successfully carried out 36 face-to-face visits. Healthwatch Bromley engaged with service users and collected patient experience feedback from across the borough during visits to GP practices, hospitals, vaccination and community health centres.

During this time, 600 reviews were collected. Of the 600 reviews collected this quarter, 422 (70%) were positive with star rating 4-5, 31 (5%) neutral with star rating 3 and 147 (25%) negative with star rating 1-2. Overall, for this quarter, positive patient experiences outweigh negative patient ones, and this is very similar to our reviews analysed in the previous Q1 report, April - June 2022. If we look beyond this overall picture at specific service areas, findings indicate the following:

Hospital

- Hospitals received the largest number of reviews this quarter (173) and feedback we gathered from patients was overall very good. We also received a significantly larger number of reviews this quarter in comparison to Q1 (88).
- Of the 173 reviews gathered, 26% (45) were negative, 7% (12) were neutral, and 67% (116) were positive. In comparison to Q1, the positive reviews have gone down marginally (61%).
- The feedback reveals a high satisfaction with **Staff Attitudes, Quality of Care/Treatment, Cleanliness, Hygiene & Infection Control and Appointments**.
- The main concern identified is long **Waiting Times**, which was also identified in the Q1 report (April - June 2022) and the Q4 report (January - March 2021), so there is still room for improvement. We also received feedback that indicates a number of people are dissatisfied with **Parking** facilities at hospitals.

GP Services

- GP services received the second highest number of reviews this quarter (159). Of these 23% (36) were negative, 8% (13) were neutral, and 69% (110) were positive. In comparison to Q1, the positive reviews have gone up by over 10% (58%). This indicates people have been more satisfied with their experience visiting a GP practice over the past three months.
- The majority of service users were satisfied with **Staff Attitudes, Quality of Care/Treatment, and Cleanliness, Hygiene and Infection Control and Waiting Times**.
- **Appointments** and **Waiting Times** have improved since the previous quarterly report which shows signs of improvement.
- The main area that suggests room for improvement is **Communication**, with only 40% of reviews being positive.

Dentist

- Dentists received the third highest number of reviews this quarter (123). Of these 11% (13) were negative, and 89% (110) were positive. These figures are very similar to the previous quarter, which received 14% negative, 1% neutral and 85% positive reviews.
- The majority of service users found dentists to be excellent. Feedback showed high satisfaction across all themes; **Quality of Care/Treatment, Staff Attitudes, Communication, Appointments, Information, Advice & Guidance, Service Co-Ordination, and Cleanliness, Hygiene & Infection Control**. This reflects our findings in the Q1 (April - June 2022) and Q4 (January - March 2021) reports.
- The negative feedback received was low. This indicates that the majority of dental practices met the needs of their service users with a small scope for improvement in **Appointments, Communication and Staff Attitudes**.

We also received a high number of positive reviews for Pharmacy, COVID-19, and Opticians. We were able to speak to multiple residents and hear about their experience of having vaccinations. We also visited mental health services in September and managed to gather patient experience feedback that was equally positive and negative. We aim to carry out more face-to-face engagement visits over the next quarter and share further intelligence regarding this particular service.

Healthwatch Bromley places great importance on understanding the needs of Bromley communities and ensuring all groups are heard. Due to staff capacity, we were unable to collect a large amount of demographic information (pg.17-18). However, we continue to train all staff on diversity and inclusion. We always seek to improve the completion of monitoring data for every quarterly report. We recognise the importance of capturing feedback from diverse local communities.

Actions, impact and next steps

Healthwatch Bromley will share the findings contained within this report with various commissioner, provider and local authority led boards and committees. These include:

- One Bromley Local Care Partnership Board
- South East London Integrated Care Partnership Board
- One Bromley Communication & Engagement Sub-Group
- Bromley Health and Wellbeing Board
- Health Scrutiny Sub-Committee
- Kings College NHS Foundation Trust Patient Experience Committee (PEC)

As well as formal meetings, informal meetings take place with partners to discuss issues of concern and identify actions to address them. For example, we hold regular meetings with the Acting Head of Primary Care in Bromley to share key information and work together to improve patients' feedback. We also use our social media platforms, Twitter, Instagram, and Facebook, to raise awareness of our organisation and the work that we do.

Next steps for Healthwatch Bromley Patient Experience programme - we will continue to engage service users in innovative ways, respecting COVID-19 social distancing measures, to obtain patient feedback and experience of health and social care services and collect reviews using different methods and actions such as:

- Working with volunteers to visit health and social care services on a weekly basis to talk to and hear from patients, service users, carers, and relatives about their experiences of local services.
- Extracting reviews from external online review platforms e.g. NHS, Care Home, Care Opinion, Google reviews and others
- Promoting our service through health and social care service providers
- Working with key partners such as Bromley Council, voluntary and community organisations
- Working with volunteers to support the patient experience programme, to achieve our quarterly targets
