

Bromley Town Centre Supplementary Planning Document

Strategic Environmental Assessment Screening Statement – July 2022 (with post-consultation update August 2023)

1. Purpose of Sustainability Appraisal (SA) / Strategic Environmental Assessment (SEA)

- 1.1. This Strategic Environmental Assessment (SEA) screening is being prepared in accordance with the requirements of European Directive 2001/42/EC ("the Directive"); and the Environmental Assessment of Plans and Programmes Regulations 2004 ("the Regulations"). The following guidance has also been taken into account:
 - The National Planning Policy Framework (NPPF) (July 2021)¹.
 - The National Planning Practice Guidance (PPG) in relation to SEA/SA².
 - A Practical Guide to the Strategic Environmental Assessment Directive (ODPM, 2005)³.
- 1.2. Sustainability Appraisal (SA) is the process by which the Directive is applied to Local Plan documents. An SA is required under the Planning and Compulsory Purchase Act 2004 for all Development Plan Documents (DPDs) and Supplementary Planning Documents (SPDs). The Directive also requires a SEA to be carried out on certain types of plans with significant environmental effects.
- 1.3. Both SA and SEA processes are undertaken during the preparation of a plan or strategy to aid the implementation of sustainable development. The main difference between them is that while an SEA has more of an environmental focus, the SA should focus on social, economic and environmental issues.
- 1.4. Although SA and SEA are distinct requirements, government guidance has recommended a single appraisal process. The SA process for planning documents translates the requirements of the Directive, and Government guidance on undertaking SAs has been prepared so as to incorporate the requirements of the SEA Directive.
- 1.5. Bromley's Development Plan consists of the Bromley Local Plan and the London Plan. The Bromley Local Plan and the London Plan have both been subject to a SA/SEA
- 1.6. The PPG⁴ states that:

"Supplementary planning documents do not require a sustainability appraisal but may in exceptional circumstances require a strategic environmental assessment if they are likely to have significant environmental effects that have not already have been assessed during the preparation of the relevant strategic policies.

A strategic environmental assessment is unlikely to be required where a supplementary planning document deals only with a small area at a local level (see regulation 5(6) of the Environmental Assessment of Plans and Programmes

Regulations 2004), unless it is considered that there are likely to be significant environmental effects."

2. Bromley Town Centre SPD

- 2.1. The Bromley Town Centre SPD provides guidance on the interpretation of adopted planning policies as they relate to the Bromley Town Centre area.
- 2.2. The SPD sets out a number of design principles derived from existing Development Plan policies and national policy:
 - Contextual (Character and Identity)
 - Responsive (Architecture and Landscape)
 - Connected (Movement and Connectivity)
 - Inclusive (Access and Inclusion)
 - Healthy (Health and Well-being)
 - Sustainable (Sustainable Design, Adaptability and Resilience)
- 2.3. These design principles are considered essential components in delivering good quality design, and which are widely documented as being among the key characteristics of successful well-designed places:
- 2.4. The SPD divides the Bromley Town Centre area into a series of character areas, which have been derived through consideration of the context of the wider area and represent those parts of the area which are considered to have similar characteristics. Guidance is provided for each character area, derived from existing planning policies, including guidance on existing site allocations and some further potential development opportunities. General guidance is also provided which applies across all character areas, covering topics such as heritage and conservation, green infrastructure and biodiversity and sustainability.

3. The Screening Process

- 3.1. Though not part of the statutory Development Plan, SPDs can cover a range of issues, which generally interpret policies in the Development Plan. If an SPD is considered unlikely to have significant environmental effects through the screening process, then the conclusion will be that the SEA is not necessary.
- 3.2. To assess whether an SEA is required the Responsible Authority (Bromley Council) must undertake a screening process based on a standard set of criteria. Where the Responsible Authority determines that the plan or programme is unlikely to have significant environmental effects, and therefore does not need to be subject to full SEA, it must prepare a statement showing the reasons for this determination.
- 3.3. This must be subject to consultation with Historic England, the Environment Agency and Natural England. Following consultation, the results of the screening process must be detailed in a Screening Statement, which is required to be made available to the public. The three consultation bodies were consulted during the preparation of this SEA screening statement, prior to consultation on the draft SPD; details of their responses are provided at Appendix 1.
- 3.4. The Council then consulted on the SEA screening statement as part of the draft SPD consultation. The three consultation bodies were specifically consulted as part of this consultation exercise; their responses are set out at Appendix 2.
- 3.5. Following the consultation on the draft SPD and the representations made, the Council has reviewed this SEA screening statement, to ascertain whether any changes are necessary in light of representations received.

- 3.6. Key to the screening decision is the determination of whether the SPD is likely to have significant environmental effects. To assess this, the Council has taken a twostep approach:
 - First, to assess the plan against the guidance set out in 'A Practical Guide to the Strategic Environmental Assessment Directive'5. The guidance sets out a flow chart to guide application of the Directive to plans and programmes (shown in Figure 1); the screening questions from the guidance are set out in Table 1, alongside the Council's response in relation to the Bromley Town Centre SPD.
 - Second, using the criteria set out in Schedule 1 of the Regulations to determine whether the SPD will have significant environmental effects. These criteria are set out in Table 2, alongside the Council's response in relation to the Bromley Town Centre SPD.

Figure 1: flow chart to assist with the application of the SEA Directive to plans and programmes

[&]quot;The Directive requires Member States to determine whether plans or programmes in this category are likely to have significant environmental effects. These determinations may be made on a case by case basis and/or by specifying types of plan or programme.

4. Screening assessment

Table 1: assessment against criteria in A Practical Guide to the Strategic Environmental Assessment Directive

EIIVII	Environmental Assessment Directive			
	Screening Question	Screening Assessment		
1	Is the SPD subject to preparation and/or adoption by a national, regional or local authority OR prepared by an authority through legislative procedure by Parliament or Government?	Yes. The SPD will be prepared and adopted by the London Borough of Bromley in its role as Local Planning Authority.		
2	Is the SPD required by	No. The preparation of a SPD is optional.		
	legislative, regulatory or administrative provisions?	However, once adopted by the London Borough of Bromley, it will be a material consideration in the determination of planning applications.		
3	Is the SPD prepared for agricultural, forestry, fisheries, energy, industry, transport or waste management, telecommunications, tourism, town and country planning or land-use, AND does it set a framework for future development consent of projects in Annexes I and II to the EIA Directive?	Yes. The SPD will not create new policy or land use designations, but it will provide further guidance to support the Local Plan and London Plan, which is the town planning policy framework for its area and includes policies for land-use. However, the Local Plan and London Plan has been subject to full SA (including SEA). The SPD does set out character areas within Bromley Town Centre, but these are not land use designations; they are broad areas which share similar characteristics, which have been identified for the purposes of providing further guidance in relation to land use and design.		
4	Will the SPD, in view of its likely	No. The Local Plan and London Plan were subject		
	effects on sites, require an assessment under Article 6 or 7 of the Habitats Directive?	to screening for the need for assessment under the requirements of the Habitats Directive and it was concluded that such assessment was unnecessary. As the SPD will not change or add to policy, proposals or designations within the Core Strategy it is not considered that further screening for such assessment is necessary as there would be no likely effects on European Sites.		
5	Does the SPD determine the use of small areas at local level, OR is it a minor modification of a plan subject to Article 3.2?	No. The SPD will complement the policies that have already been set within the Local Plan and London Plan. No aspects of the SPD will modify existing adopted policies nor seek to change existing site allocations, nor add new ones. The SPD will provide guidance on interpreting a number of Development Plan policies in relation to Bromley Town Centre, particularly land use and design guidance. This includes guidance for development opportunities on unallocated sites, but these will not constitute site allocations – they will apply relevant Development Plan policy to these sites to guide potential development.		
6	Does the SPD set the	No. This framework is already set within the		
	framework for future	Development Plan. The SPD will provide further		

	Screening Question	Screening Assessment
	development consent of projects (not just projects in Annexes to the EIA Directive)?	guidance on the implementation of these policies.
7	Is the SPD's sole purpose to serve the national defence or civil emergency, OR is it a financial or budget plan, OR is it co-financed by structural finds or EAGGF programmes 2000- 2006/7?	No. The SPD does not fall into any of the criteria listed.
8	Is it likely to have a significant effect on the environment?	It is not likely that the SPD will have any significant effect on the environment, beyond those effects that have already been assessed through the SA (including SEA) of the Local Plan and London Plan.

environment (e.g. due to accidents) through the application of this SPD.
the effects (geographical area and localised to the Bromley Town Centre area, through
size of the population likely to be the interpretation of relevant adopted policies.
affected) by the SPD.
The value and vulnerability of the The SPD will be consistent with the Development

SEA Directive Criteria and Schedule 1 of Environmental Assessment of Plans and	London Borough of Bromley Response
Programmes Regulations 2004	
due to: i. Special natural characteristics or cultural heritage; ii. Exceeded environmental	the borough's heritage assets in a manner appropriate to their significance. This includes the Bromley Town Centre Conservation Area.
quality standards or limit values; or iii. Intensive land use.	Bromley Town Centre includes SINC designations at Church House Gardens and the Old Palace grounds. The Development Plan has policies which
iii. iii.eiieive land dee.	protect SINCs; the SPD will assist with the implementation of these policies.
	Bromley Town Centre is within an Air Quality Management Area and part of the Town Centre is identified as an Air Quality Focus Area. The SPD provides guidance on how air quality policy requirements will be delivered.
	The SPD will interpret the policies within the adopted Development Plan to set out appropriate land uses for the Bromley Town Centre area. The SPD will not result in a significantly more intensive land use than that expected via application of the adopted Development Plan policies.
	The overall likely effect of the SPD will be positive by securing the positive environmental effects of development and minimising or avoiding negative impacts.
The effects of the SPD on areas or landscapes which have recognised	There are no areas or landscapes in or around Bromley Town Centre which have recognised
national, community or international protection status.	national, community or international protection status.

5. Statement of Reasons for Determination

- 5.1. The Council believes that the impact of the draft SPD, through responses to the Criteria identified in Tables 1 and 2, will not have significant environmental effects (positive or negative) on Bromley, further to the effects that have already been assessed during the preparation of the Local Plan and the London Plan. In addition, the draft SPD is not setting new policy; it is supplementing and providing further guidance on existing policies. Therefore, it is considered that an SEA will not be required for the draft Bromley Town Centre SPD.
- 5.2. As noted in paragraph 3.5, the Council has reviewed this screening statement following the consultation on the draft SPD. We consider that the responses to the SEA criteria set out in tables 1 and 2 remain appropriate, and these responses have remained unchanged from the initial draft SEA screening statement.
- 5.3. Appendix 2 sets out the Council's response to the specific consultation responses received during the consultation on the draft SPD.

Appendix 1: responses to draft SEA screening statement from Historic England, the Environment Agency and Natural England

Consultee	Response	LBB comment
Environment Agency	No response	N/A
Historic England	No response	N/A
Natural England	Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.	Noted
	Screening Request: Strategic Environmental Assessment	
	It is our advice, on the basis of the material supplied with the consultation, that, in so far as our strategic environmental interests (including but not limited to statutory designated sites, landscapes and protected species, geology and soils) are concerned, that there are unlikely to be significant environmental effects from the proposed plan.	
	Natural England is in agreement that "as the SPD does not formulate new policy and the effects of the SPD are likely minor in nature, an SEA will not be necessary".	
	We have checked our records and based on the information provided, we can confirm that in our view the proposals contained within the plan will not have significant effects on sensitive sites that Natural England has a statutory duty to protect.	
	We are not aware of <u>significant</u> populations of protected species which are likely to be affected by the policies / proposals within the plan. It remains the case, however, that the responsible authority should provide information supporting this screening decision, sufficient to assess whether protected species are likely to be affected.	
	Notwithstanding this advice, Natural England does not routinely maintain locally specific data on all potential environmental assets. As a result the responsible authority should raise environmental issues that we have not identified on local or national biodiversity action plan species and/or habitats, local wildlife sites or local landscape character, with its own ecological and/or landscape advisers, local record centre, recording society or wildlife body on the local landscape and biodiversity receptors that may be affected by this plan, before determining whether an	

Consultee	Response	LBB comment
	SA/SEA is necessary.	
	Please note that Natural England reserves the right to provide further comments on the environmental assessment of the plan beyond this SEA/SA screening stage, should the responsible authority seek our views on the scoping or environmental report stages.	
	This includes any third party appeal against any screening decision you may make.	

Appendix 2: responses to draft SPD that relate to SEA

Consultee	Response	LBB comment
Environment Agency Historic England	No comments provided on SEA screening statement. We can confirm that Historic England agrees with the Council's assessment of SEA and do not consider that the proposed SPD would have sufficient outcomes to require full SEA and the guidance set out in the document provides further advice on how existing policies should be interpreted and implemented.	N/A Noted
Natural England	A SPD requires a Strategic Environmental Assessment only in exceptional circumstances as set out in the Planning Practice Guidance here. While SPDs are unlikely to give rise to likely significant effects on European Sites, they should be considered as a plan under the Habitats Regulations in the same way as any other plan or project. If your SPD requires a Strategic Environmental Assessment or Habitats Regulation Assessment, you are required to consult us at certain stages as set out in the Planning Practice Guidance. Should the plan be amended in a way which significantly affects its impact on the natural environment, then, please consult Natural England again.	Comments noted. The Council considers that an SEA is not required, as set out above.
